

Press Release

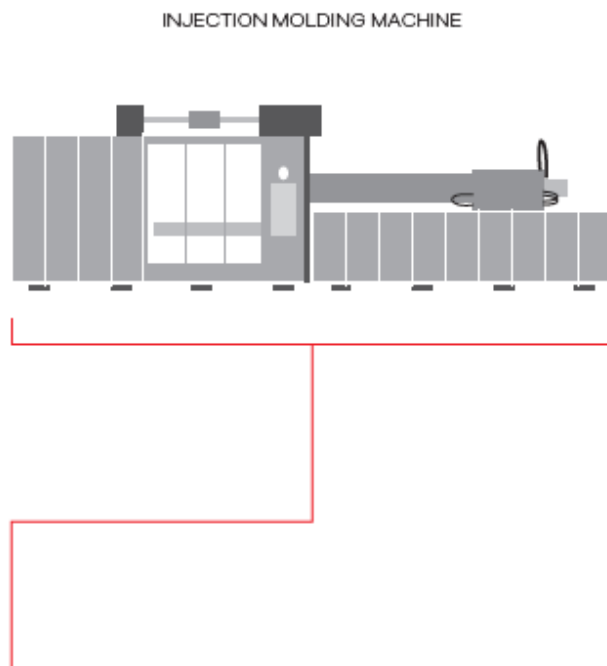

Solutions along the entire process chain

Process chain of the PCH business unit

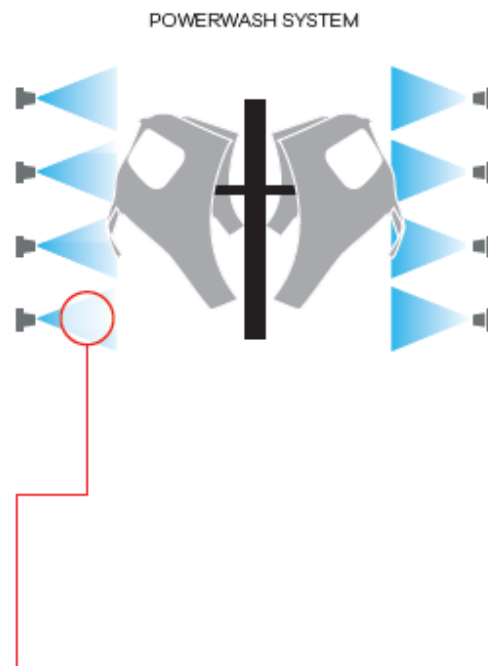

To illustrate and simplify the explanation, the process chain of the PCH business unit was depicted in a clear graphic.

The products and solutions from Zeller+Gmelin cover the entire process chain in the manufacture and painting of plastic components.

Lubrication and maintenance

Divinol hydraulic oils for lubricating the hydraulic part of the system and **Divinol greases for lubricating** the relevant parts of the injection molded part and mold clamping part so that they work with as little wear as possible despite high temperatures

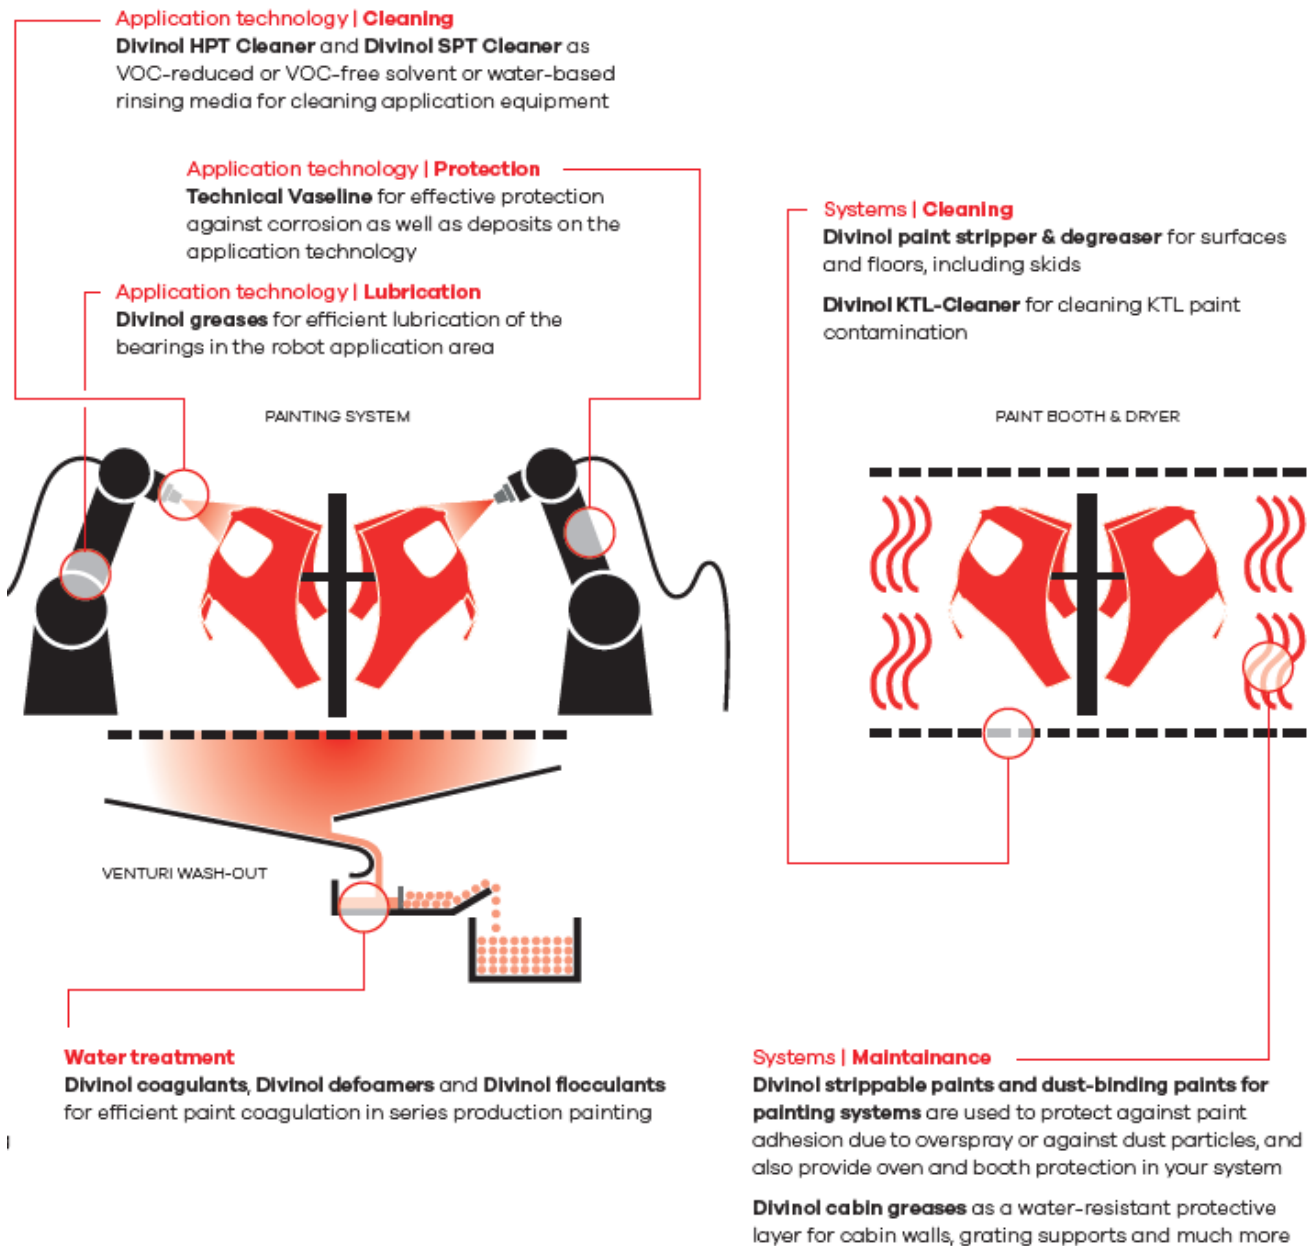

Cleaning/degreasing

Divinol spray cleaners reliably remove release agents and particle contamination from plastic surfaces even at room temperature without neglecting the biostability or foaming behavior

Drainage aid

Divinol Quick-Rinse for regulating the drainage of water from plastic surfaces

Our portfolio includes:

- + Products for the lubrication and maintenance of injection moulding machines
- + Cleaning and degreasing agents for powerwash systems as well as a drainage aid to regulate the drainage of water on plastic surfaces

ZELLER+GMELIN

- + Cleaning agents as well as products for the protection and lubrication of the application technology of painting plants
- + Products for water treatment of the Venturi washout of painting systems
- + Products for the maintenance of paint booths and dryers
- + Products for cleaning equipment and equipment accessories

Our service team accompanies our customers along the entire process chain.
